# Your Local Dental Specialist

Since 2003, A2Z Dental has proudly served Central Queensland families, bringing a blend of compassion, expertise, and advanced dental technologies to every appointment. Our mission is simple: to provide truly individualised care that feels more like visiting friends than visiting a clinic.

## Our Approach

### Personal Connection

- You'll see the same friendly team at every visit—no feeling like just another number.

### Anxiety-Free Dentistry

- We offer sedation and gentle techniques for a calmer experience, especially for those with dental anxieties.

### Advanced Convenience

- From same-day crowns to comprehensive treatments, we minimise extra referrals and reduce waiting times.

### Flexible & Affordable

- Payment plans, health fund support, and participation in the Child Dental Benefits Schedule help make quality dentistry accessible.

### Community-Focused

- We've invested in supporting local schools and families for over 20 years and counting.

### Decades of Expertise

- Our dentists collectively bring 40+ years of experience to address your unique dental challenges.

### Bespoke Smile Design

- Cosmetic and implant solutions tailored to your specific needs—never one-size-fits-all.

## Who We Serve

### Families & Busy Parents

- Gentle children's dentistry and a schedule that fits around your life.

### Patients with Dental Anxiety

- Sedation options and a calm, supportive environment to help you feel at ease.

### Adults Seeking Advanced Procedures

- Implants, cosmetic makeovers, and complex reconstructions—all under one roof.

## How to Use This Guide

In the following pages, you'll find our most common treatments and indicative pricing. Please note that exact costs will vary based on your individual needs, the complexity of the procedure, and specific materials used. We encourage you to book a consultation for a personalised treatment plan and an accurate quote.

# General Dentistry

General dentistry is the cornerstone of preventive oral care, focusing on routine check-ups, cleanings, and early detection of potential issues.

At A2Z Dental, we emphasise proactive care to maintain strong teeth and healthy gums. Our general dentistry services—like check-ups, cleanings, and fillings—act as the first line of defence against more complicated dental problems down the road. By identifying and treating issues early, we help you avoid the discomfort and cost of extensive treatments later on. Our experienced team ensures each visit is as comfortable and efficient as possible, whether you're in for a routine clean or a filling to repair a cavity.

## Treatments Pricing

### Check-up & Clean

from **\$200-\$350**

Routine examination and professional cleaning to maintain oral hygiene and spot potential problems.

### Dental Fillings

from **\$150-\$400** per tooth

Repairs tooth decay, restoring function and preventing further damage.

*The prices listed are indicative only and may vary depending on individual needs, treatment complexity, and materials used. A personalised consultation is required for an accurate quote.*

## Things To Consider

- Early intervention can save time and money in the long run.
- Health fund rebates may reduce out-of-pocket costs.
- Ideal for all ages, ensuring the entire family's oral health is monitored.

# Cosmetic Dentistry (Smile Design)

Cosmetic dentistry enhances the appearance of your teeth, boosting both your confidence and your smile.

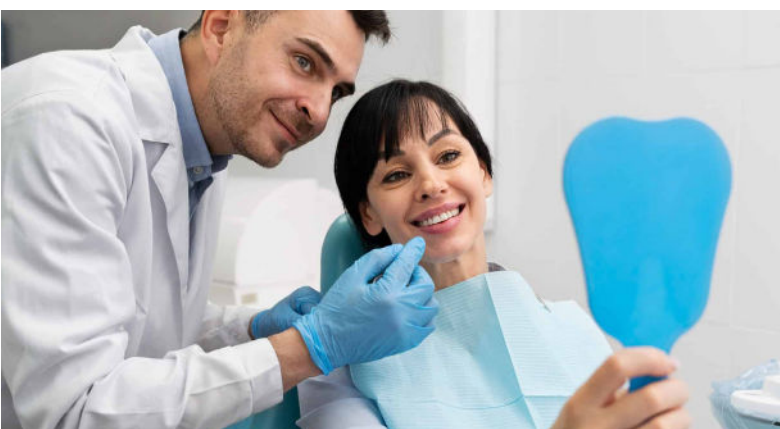

If you've ever wished for a brighter, straighter, or more uniform smile, our cosmetic dentistry services may be just what you need. Porcelain or composite veneers can effectively mask imperfections such as chips or discolouration, while professional whitening treatments offer a quick way to brighten your teeth. We take a personalised approach to smile design, ensuring that each treatment plan is aligned with your unique facial features, lifestyle, and personal goals.

## Treatments Pricing

Porcelain Veneers	Composite Veneers	Teeth Whitening
from <b>\$1500-\$2500</b> per tooth	from <b>\$500-\$1200</b> per tooth	from <b>\$300-\$800</b> per treatment
Durable and natural-looking shells placed over teeth to correct colour, shape, and alignment issues.	A less invasive and more budget-friendly option to refine minor imperfections.	Professional bleaching methods for significant, safe, and long-lasting brightness.

*The prices listed are indicative only and may vary depending on individual needs, treatment complexity, and materials used. A personalised consultation is required for an accurate quote.*

## Things To Consider

- Personalised consultations help determine the best cosmetic approach.
- Many treatments can be completed in one or two visits.
- A customised smile design can dramatically impact your overall confidence.

**Book Your Consultation Today:** 07 4923 7350 | [reception@a2zdental.com.au](mailto:reception@a2zdental.com.au)

# Orthodontics

Orthodontics aligns crooked or crowded teeth and corrects bite issues, improving both function and aesthetics.

Whether you're an adult or a teenager, orthodontic treatments can dramatically change the look and feel of your smile. Traditional braces use metal brackets and wires for reliable, time-tested results, while clear aligners offer a discreet alternative for those who prefer a more subtle appearance. We work closely with you to develop an orthodontic plan that matches your lifestyle, timeline, and specific alignment issues, ensuring a healthier, more confident smile.

## Treatments Pricing

### Traditional Braces

from **\$5000-\$9000**

Metal brackets and wires gradually move teeth into optimal positions.

### Clear Aligners

**Mild:** from **\$7,000 - \$8,000**  
**Moderate:** from **\$8,500 - \$9,500**  
**Complex:** from **\$10,500+**

Nearly invisible trays that gently straighten teeth with minimal interference in daily life.

*The prices listed are indicative only and may vary depending on individual needs, treatment complexity, and materials used. A personalised consultation is required for an accurate quote.*

## Things To Consider

- Treatment timelines range from 6 months to 2+ years, depending on complexity.
- Retainers are vital to maintain results post-treatment.
- Various financing options are available to make orthodontic care more accessible.

**Book Your Consultation Today:** 07 4923 7350 | [reception@a2zdental.com.au](mailto:reception@a2zdental.com.au)

# Dental Implants

Dental implants offer a long-lasting solution to missing teeth by providing a stable foundation that feels and functions like natural teeth.

Implants are titanium posts surgically placed in the jawbone to replace tooth roots, creating a secure base for crowns, bridges, or full-arch restorations. This advanced option not only restores your smile's appearance but also prevents bone loss that often accompanies missing teeth. Although the process can take several months—from consultation to final placement—the long-term benefits make implants a worthwhile investment for many patients seeking a permanent alternative to dentures or bridges.

## Treatments Pricing

Single Tooth Implant	Implant-Supported Bridge	All-on-X Implants
from <b>\$4500-\$6500</b> per tooth	from <b>\$10,000-\$12,500</b>	from <b>\$28,000-\$32,000</b> per arch
A robust, long-lasting replacement for a single missing tooth.	Efficiently replaces multiple missing teeth with fewer implanted posts.	Full arch restoration using strategically placed implants for a completely new smile.

Bone Grafting
from <b>\$500-\$3000</b>
Improves bone density for successful implant placement.

*The prices listed are indicative only and may vary depending on individual needs, treatment complexity, and materials used. A personalised consultation is required for an accurate quote.*

## Things To Consider

- Typically involves multiple stages, including healing and crown fabrication.
- High success rate when coupled with good oral hygiene.
- Consultation needed to assess bone health and overall suitability.

**Book Your Consultation Today:** 07 4923 7350 | [reception@a2zdental.com.au](mailto:reception@a2zdental.com.au)

# Wisdom Teeth & Extractions

Extractions remove problematic teeth to alleviate pain, prevent infection, and protect overall oral health.

Sometimes, a tooth is too damaged to save or is causing overcrowding—particularly in the case of wisdom teeth. Extractions can be simple or surgical, depending on the tooth's position and condition. For impacted wisdom teeth or those that haven't erupted fully, a minor surgical procedure might be required. Our team provides sedation options and post-operative care instructions to ensure a smooth recovery and minimal discomfort.

## Treatments Pricing

Simple Extraction	Surgical Extraction	Wisdom Teeth Removal
from <b>\$150-\$300</b> per tooth	from <b>\$300-\$600</b> per tooth	from <b>\$250-\$600</b> per tooth
Straightforward removal of a tooth that's fully visible and easily accessible.	Involves more complex procedures, often for teeth that are broken or impacted.	Specific focus on third molars that frequently cause crowding or infections.

*The prices listed are indicative only and may vary depending on individual needs, treatment complexity, and materials used. A personalised consultation is required for an accurate quote.*

## Things To Consider

- Healing typically takes 1–2 weeks, but varies per individual.
- Following post-op instructions significantly reduces the risk of complications.
- Sedation is available for patients with anxiety or complex extraction cases.

**Book Your Consultation Today:** 07 4923 7350 | [reception@a2zdental.com.au](mailto:reception@a2zdental.com.au)

# Root Canal Treatment

Root canal therapy removes infected or damaged pulp inside a tooth, providing relief from pain and preserving the natural tooth structure.

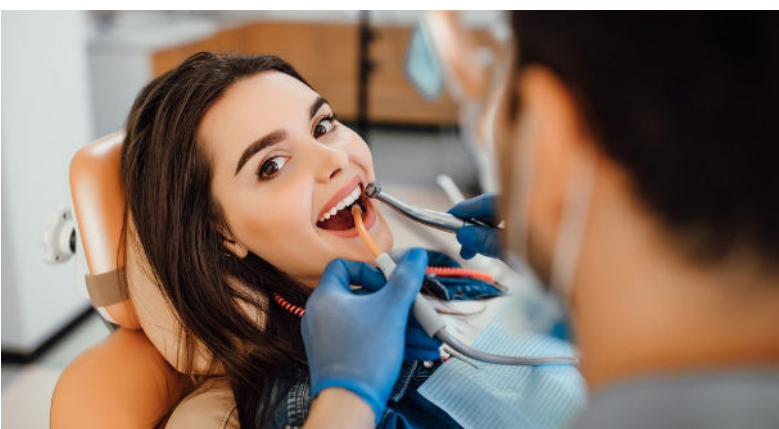

When a tooth becomes infected or deeply decayed, a root canal can often save it from extraction. During the procedure, the diseased pulp is removed, the internal space is disinfected, and the tooth is sealed to prevent further infection. While many patients worry about discomfort, modern techniques and sedation options make the process similar to a standard filling. Preserving your natural tooth is almost always preferable to extraction, helping maintain normal bite function and jaw alignment.

## Treatments Pricing

Front Tooth	Premolar Tooth	Molar Tooth
from <b>\$700-\$1200</b>	from <b>\$900-\$1500</b>	from <b>\$1200-\$2000</b>
Generally the simplest due to a single canal.	Often contains one or two canals, requiring more complex work.	Multiple canals and additional complexity lead to higher costs.

*The prices listed are indicative only and may vary depending on individual needs, treatment complexity, and materials used. A personalised consultation is required for an accurate quote.*

## Things To Consider

- A crown is often recommended post-root canal to strengthen the treated tooth.
- Relieves toothache and helps you maintain a natural, functional tooth.
- Regular check-ups ensure ongoing oral health after treatment.

**Book Your Consultation Today:** 07 4923 7350 | [reception@a2zdental.com.au](mailto:reception@a2zdental.com.au)

# Crowns & Bridges

Crowns and bridges restore damaged or missing teeth, protecting weakened structures and improving both function and appearance.

A crown serves as a protective cap for a tooth that has been compromised by decay or trauma, restoring its shape, size, and strength. Bridges fill the gap left by missing teeth, anchoring to adjacent healthy teeth or implants for stability. Both options can be crafted from various materials, including porcelain and metal alloys, depending on functional needs and budget. These restorations are designed to blend seamlessly with your natural teeth, ensuring a balanced, healthy bite.

## Treatments Pricing

### Dental Crowns

from **\$1200-\$2500** per tooth

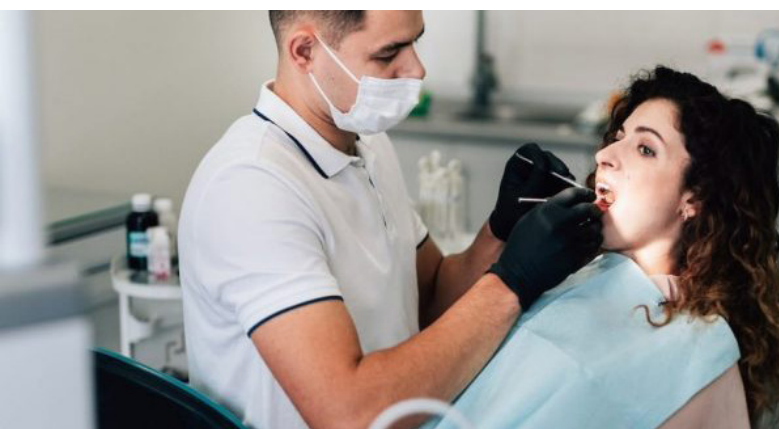

Reinforces a weakened tooth or covers a dental implant post.

### Dental Bridge

from **\$3500-\$6000**  
(depending on length)

A fixed solution for missing teeth, using surrounding teeth or implants for support.

*The prices listed are indicative only and may vary depending on individual needs, treatment complexity, and materials used. A personalised consultation is required for an accurate quote.*

## Things To Consider

- Material choices include porcelain-fused-to-metal, ceramic, or zirconia.
- Longevity depends on oral hygiene and routine check-ups.
- Can be combined with other restorative procedures for comprehensive smile rehabilitation.

**Book Your Consultation Today:** 07 4923 7350 | [reception@a2zdental.com.au](mailto:reception@a2zdental.com.au)

# Dentures & Partial Dentures

Dentures restore your ability to eat, speak, and smile confidently by replacing multiple missing teeth with a removable dental appliance.

For patients who have lost several or all of their teeth, dentures offer a cost-effective solution. Full dentures replace an entire arch of missing teeth, while partial dentures fill in gaps when some natural teeth remain. Modern materials and techniques ensure a more comfortable fit, and periodic adjustments or relines help maintain functionality over time. Whether you need a complete solution or something more selective, dentures can significantly improve your quality of life.

## Treatments Pricing

### Full Dentures

from **\$1500-\$3500** per arch

Replaces all teeth in the upper or lower arch.

### Partial Dentures

from **\$800-\$2500** per arch

Fits around remaining natural teeth for a balanced, natural appearance.

*The prices listed are indicative only and may vary depending on individual needs, treatment complexity, and materials used. A personalised consultation is required for an accurate quote.*

## Things To Consider

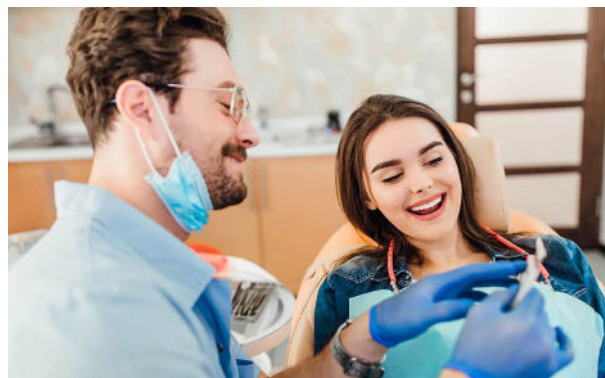

- May require periodic relining to accommodate changes in jaw structure.
- Various materials (acrylic, metal, flexible polymers) offer different benefits.
- Proper care and cleaning extend the lifespan of your dentures.

**Book Your Consultation Today:** 07 4923 7350 | [reception@a2zdental.com.au](mailto:reception@a2zdental.com.au)

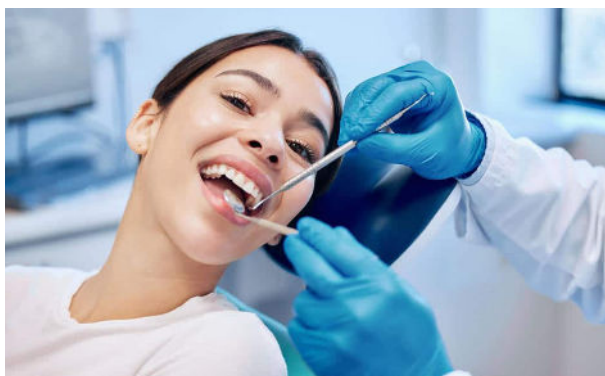

## Indicative Pricing Only

The prices listed throughout this guide are intended as a general estimate to help you understand the typical range for each treatment. Every smile is unique, and actual costs can vary depending on individual needs, the complexity of the procedure, and the materials used. A thorough clinical assessment is essential to provide an accurate treatment plan and cost estimate tailored specifically to you.

## Insurance & Rebates

If you have private health insurance with extras cover, you may be eligible for significant rebates on many dental treatments. We can provide you with item codes in advance so you can check your entitlements with your fund. We also accept all major health funds and can process claims on the spot through HICAPS for your convenience.

## Flexible Payment Options

We believe that dental care should be accessible, not stressful. That's why we offer flexible payment plans and financing options for eligible treatments. We're also proud to participate in the Child Dental Benefits Schedule (CDBS), helping eligible families access essential dental services for their children. Our team is happy to walk you through all available options to find a solution that works for your budget.

## Book Your Personalised Consultation

The best way to understand your treatment options—and their associated costs—is to book a one-on-one consultation with our team. During this appointment, we'll assess your oral health, discuss your goals, and create a custom treatment plan. You'll receive a clear, itemised quote before any treatment begins, so there are no surprises.
